Ref.name: EWIS project 5.0464  
or: invoice/project number

## Scope of supply

The training will be given at the offices of ECN.

The work consists of the two-day (optionally three-day) training as described in the brochure "CO-920 Training Rotor Aerodynamics" (brochure to be downloaded at [www.ewis.nl](http://www.ewis.nl)). The final content and time schedule will be agreed upon with the participants. The number of participants is not limited but if more than six persons are going to participate the training might become less efficient. The language used during the courses will be English.

The scope of supply price includes the preparation of the course, handouts, and lunch at ECN. The costs for travel, accommodation during night and the subsistence cost of the participants are excluded.

## Optional (in combination with BOT/ATG licence): using BOT and ATG software tools

If the client purchases or has already purchased BOT and ATG licenses, then it is possible to have a practical training by using these software tools at the end of the course. By choosing this option, there is a possibility to apply the theoretical information given in the course and to model your blade design with ATG and BOT software tools. This option will also help the client to learn all features of BOT and ATG.

## Optional: Training at offices of Client

In case the training needs to be given at the offices of the Client, travel expenses for the ECN employee(s) will be charged additionally. If applicable, also the travel time of our employee(s) will be charged additionally at an hourly rate of € 140.

This order form and prices mentioned are valid until 31 December 2012
