Scope of supply

The scope of supply of FarmFlow comprises the following.

- FarmFlow software (with hardware key)
- User manual

Included in the price is 16 man-hours technical and software support by telephone and/or e-mail. Not included is on-site support.

Any update of the software released within one year after the date that ECN has received the signed order form will be sent to Licensee free of charge and can be used for the time the license is valid.

After one year it is possible to extend the software license with another year for 1/3 (one third) of the purchase price valid at that time. This entitles the user to updates of the software, if available, and a maximum of 16 man-hours software support (by telephone and/or e-mail, not on-site) for another year. ECN will contact you before the end of the one-year support period to offer you the possibility of a service contract.

Second and further licenses can only be purchased with expiration dates equal to the expiration date of the first license. The fee will become equal to the number of months remaining to the expiration date of the first license times 1/12 (one twelfth) of the original fee.

The software and documentation are written in English.

Optional: Training

If you also order the training, we will contact you as soon as possible to make arrangements for the date and venue. The stated price for the training is valid when the training is held at ECN's facilities and includes the preparation of the course, handouts, lunch at ECN, etc. The price excludes the cost for travel, accommodation during night and the subsistence cost of the participants. If you prefer training in-house, the travel expenses and travel time for ECN employees will be charged additionally. The invoice will be sent after the training is given. The payment is to be made within 30 days after invoicing.

This order form and prices mentioned are valid until 31 December 2012.
