## Scope of supply

The scope of supply of TURBU comprises the following:

- TURBU source code (MATLAB .m files library)
- TURBU application and example files, including two predefined wind turbine models
- User manual and technical documentation

The software and documentation are written in English.

Included in the price is 16 man-hours of software support (by telephone or email, not on site), bug fixes and updates during the period of one year after delivery of the software. Modifications of the TURBU source fall outside the scope of the software support.

After one year, a maintenance and service contract is available for € 6 000. This entitles the user to updates of the software and a maximum of 24 man-hours software support (by telephone and/or e-mail, not on-site) for another year. ECN will contact you before the end of the one-year support period to offer you the possibility of a service contract.

## Optional:

### Basic training

A one-week training in TURBU basics and use given by ECN product specialists is offered as an option for € 10 000. If you also order the training, we will contact you as soon as possible to make arrangements for the date and venue. The stated price for the training is valid when the training is held at ECN's facilities and includes the preparation of the course, handouts, lunch at ECN, etc. The price excludes the cost for travel, accommodation during night and the subsistence cost of the participants. If you prefer training in-house, the travel expenses and travel time for ECN employees will be charged additionally. The invoice will be sent after the training is given. The payment is to be made within 30 days after invoicing.

This order form and prices mentioned are valid until 31 December 2012.
